

# Inspiring Ireland, Inspiring Students

Dr. Fidelma Healy Eames is delighted to announce that the next 'Inspiring Ireland Inspiring Students' interview, in collaboration with ESCI is with

**Chris Hadfield**

**Canadian Astronaut**

**Monday March 28th @ 2pm**

**Canadian, Chris Hadfield spent 21 years as an astronaut. Yet, of that time he spent only 166 days in space across three missions, including heading up the International Space Station (ISS). So what was he doing for the rest of his time as an astronaut? How did he prepare for a space mission? What was it like to play his guitar in the space station, to go on a space walk - what did he learn and how does this enhance our understanding of existence? What does earth look like from outer space and what was it like to communicate via twitter with people on earth while in space? Was he ever afraid? We have so much to learn from Chris!**

**If you or your students want to participate - forward your Questions to [fidelma@studyandcareers.ie](mailto:fidelma@studyandcareers.ie) or to twitter [@educate\\_talent](https://twitter.com/educate_talent) by March 21st.**

**Together with myself, you will have front row seats to learn from the insights and experiences of a real live astronaut who was the first Canadian to walk in space. How cool is that!**

**Register [HERE](#) or  
at your local Education Support Centre.
